Agra, Uttar Pradesh, India

Summary

Highly motivated and results-driven first-year B.Tech student specializing in Artificial Intelligence and Machine Learning, with a robust foundation in C, C++, Python, HTML, CSS, and JavaScript. Eager to leverage foundational AI/ML and web development expertise to build innovative solutions and contribute to challenging projects that blend creativity with cutting-edge technology. Proven ability to quickly grasp new concepts and apply them to practical problems, as demonstrated through diverse project work.

Education

B.Tech in Artificial Intelligence and Machine Learning

GLA University | 2025-2029 (Pursuing)

Technical Skills

- Programming Languages: C, C++, Python, HTML, CSS, JavaScript
- AI/ML Concepts & Tools: Machine Learning Basics (Regression, Classification), Data Analysis (Pandas, NumPy - foundational), Scikit-learn (learning), TensorFlow/Keras (learning)
- Web Development: Responsive Design, Front-end Development, RESTful APIs (foundational)
- Version Control: Git, GitHub
- Other Skills: Problem-solving, Logical Thinking, Object-Oriented Programming (OOP), Teamwork

Projects

- AI-Powered Resume Feedback System (Python, HTML, CSS, JS, AI/ML Concepts)
- Developed a full-stack web application leveraging AI to analyze resumes, providing an ATS compatibility score, personalized skill suggestions, and generating an optimized resume with downloadable PDF support.
- Designed and implemented an intuitive user interface for seamless resume submission and feedback retrieval, significantly enhancing user experience.
- Khet Drishti - AI Smart Farming Platform (Conceptual Design, AI/ML Focus)

- Conceptualized and designed an AI-driven platform for farmers, integrating features for real-time crop disease detection, predictive mandi price analysis, and weather-based agricultural advisories.
 - Aimed to enhance agricultural productivity and decision-making through intelligent data analysis and predictive modeling, outlining key architectural components.
-
- Portfolio Website (HTML, CSS, JavaScript)
 - Created a responsive and interactive personal portfolio website to effectively showcase projects, technical skills, and professional aspirations.
 - Implemented modern web design principles to ensure cross-device compatibility and an engaging user experience across various devices.
-
- Tic-Tac-Toe Game (HTML, CSS, JavaScript)
 - Built an interactive two-player web-based game featuring robust win detection logic, comprehensive draw condition handling, and a seamless restart functionality for continuous play.
-
- Core C++ Programming Exercises (C++)
 - Developed a series of foundational C++ programs demonstrating core programming concepts such as loops, arrays, functions, and object-oriented programming (OOP) principles, solidifying understanding of fundamental software development practices.
